1. Document History

Version	Date	Changes log
1.0	13/06/2020	Initial Version
1.1	25/06/2020	- Changing Services URL - Adding General Guidelines and Descriptions - Adding Allowed Vehicles And Driver License Types
1.2	18/10/2020	- Modifying Service Description - Modifying Business rules and Acceptance checklist New Services: - Delete Driver Service - Delete Vehicle Service
1.3	22/06/2021	- Modifying support email - A valid restricted License in Naql portal is a perquisite to register the EFF company in Wasl
1.4	01/12/2021	- Update Document logo & platform name

Confidential - مقيد

2. Document Purpose

The purpose of this document is to define the integration requirements specifications between WASL platforms and Electronic Freight Forwarder' systems, this document is intended to guide the usability of related web services along with its business requirements and processes.

3. Support

- For Support e, Contact email: HDW@TGA.GOV.SA phone: 920000356
- For Business Support, refer to your account manager.
- For regulations inquiries, refer to TGA's web site www.TGA.gov.sa or visit TGA's head office.

4. General Guidelines for Successful Integration

- An Electronic Freight Forwarder must be registered first in Wasl platform per the procedures and get API key. API key is necessary for integration.
  Example for API key: dkccfsertjasuq90354A
- Client-id, App-id and APP-key will be given to each company. These are necessary for integration.
- All requests must use at least TLS 1.2. Using older version might result in connection being dropped.
- All requests will be made to https://Wasl.api.elm.sa/*
- Do NOT send location data from your mobile app directly. All communication with Wasl platform must be originated from your backend servers.
- All App IDs be kept a secret. Do NOT embed the APP key in your mobile App.
- Electronic Freight Forwarder is responsible for sending the vehicles information to Wasl platform.
- Electronic Freight Forwarder is responsible for sending the driver information to Wasl platform.
- Electronic Freight Forwarder is responsible for sending trip information to Wasl
- Electronic Freight Forwarder is responsible for updating trip information in Wasl
- Electronic Freight Forwarder is responsible for utilizing all provided APIs by Wasl to support his clients in getting their business works smoothly.
- Electronic Freight Forwarder is responsible to handle the exception flow of failed cases and do the correction action to solve issues that impact sending the information per acceptance checklist.

5. Glossary

Title	Description
NIC	National Information Center
WASL	Wasl is an e-platform that aims to link the organizations working in the land transport field with the organizational entities. This enables the Transport General Authority to wasl and control the land transport to raise their level of quality, safety, and security
NAQL	An electronic platform that enables individual workers and establishments in the field of transportation with all its forms to remotely apply for the various licenses necessary to carry out their works and to complete all procedures and process them electronically without having to visit the Transport General Authority or its branches and without the need to print any paper transactions
TGA	Transport General Authority
MOI	Minister of Interior
Absher	Governmental services portal (https://www.absher.sa/)
Electronic Freight Forwarder	The owner of application for freight forwarding App who has a license from TGA or under the process of getting the license.
Tracking Service Providers	The Tracking Service Providers that have a license from the TGA in providing the service for transport entities.
Eligibility	Regulatory (Business Rules) Validation Result
Eligibility Validity Period	A systematic eligibility validity period is issued for dispatching drivers/captains once they guaranty a valid and an eligible status after a successful registration in Wasl platform
Vehicle Sequence Number	Vehicle sequence number is a unique number that can be found on every Saudi Arabian vehicle license (not to be confused with chassis number)

Confidential - مقيد

6. Prerequisites & Activation Procedures

The procedures below show the steps that should be applied to get the integration completed:

#	Procedure الإجراء	Responsible Organization مسؤولية التنفيذ
1	Electronic Freight Forwarder visits The Transport General Authority to issue a registration request and issue restricted license from Naql Portal. يقوم وسيط الشحن الإلكتروني بزيارة الهيئة العامة للنقل لإصدار طلب التسجيل. وإصدار ترخيص مقيد من بوابة نقل	Electronic Freight Forwarder وسيط الشحن الالكتروني
2	Transport General Authority will send the Electronic Freight Forwarder information to Elm Company once the registration request is issued. سيتم إرسال معلومات وسيط الشحن الالكتروني إلى شركة علم فور الانتهاء من إصدار طلب التسجيل.	Transport General Authority الهيئة العامة للنقل
3	Elm's account manager will contact the Electronic Freight Forwarder to support the registration process through completing the paper work. سيقوم مدير الحساب من شركة علم بالتواصل مع وسيط الشحن الالكتروني لدعم عملية التسجيل لإكمال المتطلبات الورقية.	Elm Team فريق علم
4	Once the paper work is completed, Elm's account manager will coordinate with Electronic Freight Forwarder to initiate the technical integration process to Wasl platform as a step to complete the registration process. فور الانتهاء من المتطلبات الورقية، سيقوم مدير الحساب من شركة علم بالتنسيق مع وسيط الشحن الإلكتروني للبدء بعملية الربط التقني بمنصة وصل كخطوة لإكمال إجراءات التسجيل.	Elm Team فريق علم — Electronic Freight Forwarder وسيط الشحن الالكتروني
5	Elm's account manager informs the Transport General Authority that the Electronic Freight Forwarder has finished the technical integration process and it is ready for the field testing process. فور الانتهاء من عملية الربط التقني، سيقوم مدير الحساب من شركة علم بإبلاغ الهيئة العامة للنقل بإن وسيط الشحن الالكتروني جاهز لعملية فحص الميداني.	Elm Team فريق علم

Confidential - مقيد

6	The Transport General Authority will set the time and place for the field testing, and Elm's account manager will inform the Electronic Freight Forwarder. ستحدد الهيئة العامة للنقل المكان والوقت للفحص الميداني، وسيقوم مدير الحساب من شركة علم بإبلاغ وسيط الشحن الإلكتروني.	Transport General Authority الهيئة العامة للنقل ___ Elm Team فريق علم
7	Once the field testing process is successfully completed (PASSED), the Electronic Freight Forwarder will become eligible, thus the registration process is completed and EFF company will be able issue the final license from Naql portal فور الانتهاء من الفحص الميداني بنجاح، ستقوم الهيئة العامة للنقل بإعطاء الأهلية لوسيط الشحن الإلكتروني، وبناءً عليها تنتهي عملية التسجيل ويمكنه اصدار الترخيص النهائي من بوابة نقل.	Transport General Authority الهيئة العامة للنقل ___ Elm Team فريق علم

9 Services

9.1 Vehicle Registration Service

Description This is service shall be utilized in case of registering a new vehicle if the vehicle are not previously registered in Wasl Platform, it is also utilized for cases that requires re-registration/updating information.

وصف الخدمة تستخدم هذه الخدمة لتسجيل المركبة في حال كون المركبة لم يتم تسجيلها مسبقاً في منصة وصل، وتستخدم أيضاً في الحالات التي تتطلب إعادة التسجيل مرة اخرى مثل تحديث معلومات المركبة.

Service Details:

Service name	vehicles
Description	Register a vehicle in WASL platform
Sender	Electronic Freight Forwarder
Source	Electronic Freight Forwarder system
URL	https://Wasl.api.elm.sa/api/eff/v1/vehicles
Method	POST

Headers	
Content-Type	**application/json**
app-id	[GIVEN BY Elm FOR THE ELECTRONIC SERVICE PROVIDER]
app-key	
client-id	

Input Fields			
Field Name	**Data Type**	**M/O**	**Remarks**
sequenceNumber	String	Mandatory	The vehicle Sequence Number. It's serial number 4-9 digits can be found in right bottom of the physical vehicle license card.
plate	String	Mandatory	Vehicle plate number. Must follow the format 1234 I I I

Confidential - مقيد

			letters first and then numbers. Each letter should be separated by a space and a single space between letter and number
plateType	Integer	Mandatory	Refer to appendix for plate types

Service output

The following table shows all the messages codes, field codes and their descriptions

Output Fields			
Field Name		**Data Type**	**Description**
success		Boolean	'true' if received and validated successfully Otherwise 'false'
resultCode		String	Should be 'success', otherwise check result codes in the appendex
result	Valid	Boolean	Whether the vehicle is valid or not
	rejectionReason	String	The reason why the vehicle is not valid (refer to Appendix for more details)

Sample Input

```
{
    "sequenceNumber": "1234567890",
    "plate": "1234 ا ا ا",
    "plateType": 2
}
```

Sample Output

```
{
    "success": true
    "resultCode": "success",
    "result": {
        "Valid": true,
        "rejectionReason": null
    },

}
```

9.2 Driver Registration Service

Description This is service shall be utilized in case of registering a new Driver if the Driver is not previously registered in Wasl Platform, it is also utilized for cases that requires re-registration/updating information.

وصف الخدمة تستخدم هذه الخدمة لتسجيل السائق في حال كون السائق لم يتم تسجيله مسبقاً في منصة وصل، وتستخدم أيضاً في الحالات التي تتطلب إعادة التسجيل مرة اخرى مثل تحديث معلومات السائق.

Service Details:

Service name	drivers
Description	Register a driver in WASL platform
Sender	Electronic Freight Forwarder
Source	Electronic Freight Forwarder system
URL	https://Wasl.api.elm.sa/api/eff/v1/drivers
Method	POST

Headers	
Content-Type	application/json
app-id	[GIVEN BY Elm FOR THE ELECTRONIC SERVICE PROVIDER]
app-key	
client-id	

Input Fields			
Field Name	**Data Type**	**M/O**	**Remarks**
identityNumber	String(10)	Mandatory	Driver Id number (National ID for Saudis, Iqama ID for non-Saudis)
dateOfBirthHijri [OR] dateOfBirthGregorian	String	Mandatory	Either Hijri or Gregorian date is required
mobileNumber	String	Mandatory	Driver Mobile Number
email	String	Optional	Driver email

Confidential - مقيد

Service output

The following table shows all the messages codes, field codes and their descriptions

Output Fields			
Field Name		**Data Type**	**Description**
success		Boolean	'true' if received and validated successfully Otherwise 'false'
resultCode		String	Should be 'success', otherwise check result codes in the appendex
result	Valid	Boolean	Whether the driver is valid or not
	rejectionReason	String	The reason why the driver is not valid (refer to Appendix for more details)

Sample Input

```
{
    "identityNumber": "1000000000",
    "dateOfBirthHijri": "1350-07-20",
    "dateOfBirthGregorian": "1990-06-20",
    "email": "test@test.com",
    "mobileNumber": "+966555555555"
}
```

Sample Output

```
{
    "success": true
    "resultCode": "success",
    "result": {
        "Valid": true,
        "rejectionReason": null
         },

}
```

Confidential - مقيد

9.3 Delete Vehicle Service

Description This service shall be utilized by Electronic Freight Forwarders to delete a single vehicle previously registered in Wasl Platform.

وصف الخدمة تستخدم هذه الخدمة لحذف مركبة واحدة في حال كون المركبة تم تسجيلها مسبقاً في منصة وصل.

Service Details:

Service name	vehicles
Description	Delete a vehicle in WASL platform
Sender	Electronic Freight Forwarder
Source	Electronic Freight Forwarder system
URL	https://Wasl.api.elm.sa/api/eff/v1/vehicles
Method	DELETE

Headers	
Content-Type	**application/json**
app-id	[GIVEN BY Elm FOR THE ELECTRONIC SERVICE PROVIDER]
app-key	
client-id	

Input Fields			
Field Name	**Data Type**	**M/O**	**Remarks**
sequenceNumber	String	Mandatory	The vehicle Sequence Number. It's serial number 4-9 digits can be found in right bottom of the physical vehicle license card.
plate	String	Mandatory	Vehicle plate number. Must follow the format 1234 I I I letters first and then numbers. Each letter should be separated by a space and a single space between letter and number

Confidential - مقيد

plateType	Integer	Mandatory	Refer to appendix for plate types

Service output

The following table shows all the messages codes, field codes and their descriptions

Output Fields		
Field Name	**Data Type**	**Description**
success	Boolean	'true' if received and validated successfully Otherwise 'false'
resultCode	String	Should be 'success', otherwise check result codes in the appendix

Sample Input

```
{
    "sequenceNumber": "1234567890",
    "plate": "1234 ا ا ا",
    "plateType": 2
}
```

Sample Output

```
{
    "success": true
    "resultCode": "success",
}
```

Confidential - مقيد

9.4 Delete Driver Service

Description This service shall be utilized by Electronic Freight Forwarders to delete a single driver previously registered in Wasl Platform.

وصف الخدمة تستخدم هذه الخدمة لحذف سائق واحد في حال كون السائق تم تسجيله مسبقاً في منصة وصل.

Service Details:

Service name	drivers
Description	Delete a driver in WASL platform
Sender	Electronic Freight Forwarder
Source	Electronic Freight Forwarder system
URL	https://Wasl.api.elm.sa/api/eff/v1/drivers
Method	DELETE

Headers	
Content-Type	application/json
app-id	[GIVEN BY Elm FOR THE ELECTRONIC SERVICE PROVIDER]
app-key	
client-id	

Input Fields			
Field Name	**Data Type**	**M/O**	**Remarks**
identityNumber	String(10)	Mandatory	Driver Id number (National ID for Saudis, Iqama ID for non-Saudis)
dateOfBirthHijri [OR] dateOfBirthGregorian	String	Mandatory	Either Hijri or Gregorian date is required
mobileNumber	String	Mandatory	Driver Mobile Number

Confidential - مقيد

Service output

The following table shows all the messages codes, field codes and their descriptions

Output Fields		
Field Name	**Data Type**	**Description**
success	Boolean	'true' if received and validated successfully Otherwise 'false'
resultCode	String	Should be 'success', otherwise check result codes in the appendix

Sample Input

```
{
    "identityNumber": "1000000000",
    "dateOfBirthHijri": "1350-07-20",
    "dateOfBirthGregorian": "1990-06-20",
    "mobileNumber": "+966555555555"
}
```

Sample Output

```
{
    "success": true
    "resultCode": "success",
}
```

Confidential - مقيد

9.5 Trip Registration Service

Description This service shall be utilized by Electronic Freight Forwarders to send the trip information to Wasl Platform.

وصف الخدمة تستخدم هذه الخدمة من قبل وسيط الشحن الالكتروني لإرسال معلومات الرحلة إلى منصة وصل.

Service Details:

Service name	drivers
Description	Register a trip in WASL platform
Sender	Electronic Freight Forwarder
Source	Electronic Freight Forwarder system
URL	https://Wasl.api.elm.sa/api/eff/v1/trips
Method	POST

Headers	
Content-Type	application/json
app-id	[GIVEN BY Elm FOR THE ELECTRONIC SERVICE PROVIDER]
app-key	
client-id	

Input Fields			
Field Name	**Data Type**	**M/O**	**Remarks**
vehicleSequenceNumber	String	Mandatory	The vehicle Sequence Number. It's serial number 4-9 digits can be found in right bottom of the physical vehicle license card.
driverIdentityNumber	String(10)	Mandatory	Driver Id number (National ID for Saudis, Iqama ID for non-Saudis)
tripNumber	String	Mandatory	The unique trip number that identifies this trip in your system
departureLatitude	Double	Mandatory	Departure Latitude (The origin)
departureLongitude	Double	Mandatory	Departure Longitude (The origin)
expectedDestinationLatitude	Double	Mandatory	Expected Destination Latitude (Final Destination)

Confidential - مقيد

expectedDestinationLongitude	Double	Mandatory	Expected Destination Latitude (Final Destination)
departedWhen	String	Mandatory	Departure date

Service output

The following table shows all the messages codes, field codes and their descriptions

Output Fields		
Field Name	**Data Type**	**Description**
success	Boolean	'true' if received and validated successfully Otherwise 'false'
resultCode	String	Should be 'success', otherwise check result codes in the appendex

Sample Input

```
{
    "vehicleSequenceNumber": "1234567890",
    "driverIdentityNumber": "1000362498",
    "tripNumber": "1234",
    "departureLatitude": 24.7888129,
    "departureLongitude": 46.6354491,
    "expectedDestinationLatitude": 24.7888129,
    "expectedDestinationLongitude": 46.6354491,
    "departedWhen": "2019-05-01T14:39:00"
}
```

Sample Output

```
{
    "success": true
    "resultCode": "success"
}
```

Confidential - مقيد

9.6 Trip Update Service

Description This service shall be utilized by Electronic Freight Forwarders to send the latitude, longitude of the current location of the vehicles when the trip has ended and other information to WASL.

وصف الخدمة تستخدم هذه الخدمة من قبل وسيط الشحن الالكتروني لإرسال خطوط الطول والعرض للموقع الحالي للشاحنة عند انتهاء الرحلة إلى منصة وصل.

Service Details:

Service name	drivers
Description	Update a trip in WASL platform
Sender	Electronic Freight Forwarder
Source	Electronic Freight Forwarder system
URL	https://Wasl.api.elm.sa /api/eff/v1/trips/{tripNumber}
Method	PATCH

Headers	
Content-Type	application/json
app-id	[GIVEN BY Elm FOR THE ELECTRONIC SERVICE PROVIDER]
app-key	
client-id	

Input Fields			
Field Name	**Data Type**	**M/O**	**Remarks**
actualDestinationLatitude	Double	Mandatory	Actual Destination Latitude (Final Destination)
actualDestinationLongitude	Double	Mandatory	Actual Destination Longitude (Final Destination)
arrivedWhen	String	Mandatory	Arrival date & Time

Confidential - مقيد

Service output

The following table shows all the messages codes, field codes and their descriptions

Output Fields		
Field Name	**Data Type**	**Description**
success	Boolean	'true' if received and validated successfully Otherwise 'false'
resultCode	String	Should be 'success', otherwise check result codes in the appendex

Sample Input

```
{
    "actualDestinationLatitude": 24.7888129,
    "actualDestinationLongitude": 46.6354491,
    "arrivedWhen": "2019-05-01T14:39:00"
}
```

Sample Output

```
{
    "success": true
    "resultCode": "success"
}
```

10. Appendix

10.1 HTTP Status Codes

Status Code	Description
200	Technical success. Check resultCode for any business exception
400	Bad request. Review your call statement
500	Internal server error. Contact support team

10.2 Result Codes

The following table list the errors and information messages:

Error code	Arabic Error message	English
VEHICLE_NOT_FOUND	لم يتم العثور على المركبة	Vehicle not found
VEHICLE_PLATE_TYPE_NOT_ALLOWED	نوع لوحة المركبة غير مسموح به	Vehicle plate type not allowed
VEHICLE_NOT_ELIGIBLE	المركبة غير مؤهلة	Vehicle is not eligible
VEHICLE_IS_NOT_REGISTERED_UNDER_THE_COMPANY	المركبة غير مسجلة تحت الشركة المرسلة للطلب	The vehicle is not registered under the company that sent the request.
DUPLICATE_VEHICLE	المركبة مسجلة مسبقاً	Vehicle is already registered
DRIVER_NOT_FOUND	لم يتم العثور على السائق	Driver not found
NO_ALLOWED_DRIVING_LICENSE_FOUND	نوع رخصة السائق غير مسموح به	Driver license type is not allowed
ALL_ALLOWED_DRIVING_LICENSES_EXPIRED	رخصة السائق منتهية	Driver license has expired
DUPLICATE_DRIVER	السائق مسجل مسبقاْ	Driver is already registered
DRIVER_IS_NOT_REGISTERED_UNDER_THE_COMPANY	المركبة غير مسجلة تحت الشركة المرسلة للطلب	The driver is not registered under the company that sent the request.
DUPLICATE_TRIP	الرحلة مسجلة مسبقاْ	Trip is already registered
TRIP_NOT_FOUND	لم يتم العثور على الرحلة	Trip not found
TRIP_ALREADY_ENDED	الرحلة منتهية	Trip has ended already

Confidential - مقيد

10.3 Rejection Reasons

Error code	Arabic Error message	English
VEHICLE_NOT_INSURED	المركبة غير مؤمن عليها	Vehicle has no insurance
VEHICLE_INSURANCE_EXPIRED	تأمين المركبة منتهي	Vehicle insurance has expired
VEHICLE_LICENSE_EXPIRED	استمارة المركبة منتهية	Vehicle license has expired
ALIEN_NOT_LEGAL	وضع السائق القانوني غير صحيح	Driver legal status is not valid

10.4 Vehicle License Type

Code	Arabic Name	English Name	Applicable for Registration
1	خاص	Private	No
2	نقل عام	Public Transport	Yes
3	نقل خاص	Private Transport	No
4	حافلة صغيرة عامة	Public Minibus	No
5	حافلة صغيرة خاصة	Private Minibus	No
6	اجرة	Taxi	No
7	أشغال عامة	Heavy Equipment	No
8	تصدير	Export	No
9	دبلوماسي	Diplomatic	No
10	دراجة نارية	Motorcycle	No
11	مؤقت	Temporary	No

10.5 Driver License Types

Code	Arabic Name	English Name	Applicable for Registration
1	رخصة مؤقتة (تصريح)	TEMPORARY LICENSE (PERMISSION)	No
2	دراجة ألية	MOTORCYCLE	No
3	خاصة	PRIVATE	Yes
4	اجرة عامة	PUBLIC TAXI	Yes
5	نقل صغير / سيارات عابرة	PICKUP / PASSING CARS	No
6	نقل خفيف	LIGHT TRANSPORT	Yes
7	نقل ثقيل	HEAVY TRANSPORT	Yes
8	مركبات اشغال عامة	PUBLIC WORKS VEHICLES	No
9	حافلة صغيرة	SMALL BUS	Yes
10	حافلة كبيرة	LARGE BUS	Yes
11	عمومي خاصة	PUBLIC PRIVATE	No

Confidential - مقيد

10.6 General Business Rules

ID	Rule description
BR1	The vehicle shall have a valid license
BR2	The vehicle shall have a valid Operation Card in Naql portal
BR3	The vehicle shall have a valid Insurance
BR4	The driver shall have a valid identity
BR5	The Electronic Freight Forwarder must have a valid API KEY in WASL
BR6	The vehicle must be registered in Wasl by the Electronic Freight Forwarder and make sure it has the right status in Wasl.
BR7	The driver must be registered in Wasl by the Electronic Freight Forwarder
BR8	The Trips must be registered and updated in Wasl by the Electronic Freight Forwarder.
BR9	The Electronic Freight Forwarder must have a valid restricted license in Naql portal
